

Reduce the complexity of your cloud strategy

Seamless and cost-effective transition to the cloud

Maintaining critical services that have been developed over the years as your organization's needs have evolved can be costly. For this reason, it is essential to focus on reducing expenses derived from the maintenance and evolution of these tools.

By migrating to the cloud. In this journey you will reduce costs, risks and levels of business interruption, as long as you get the right combination of local and cloud infrastructure to **manage workloads and applications** across the enterprise. An essential lever to **accelerate the pace** and adapt to the times the market is setting for us.

The motivations are clear: to gain **agility and save costs** by outsourcing information storage and retrieval, application and web hosting, data analysis and customer relationship management systems. As well as that, in the new normality, with **hybrid working models**, the advantages become more evident.

IDC
Worldwide spending on the cloud, including services, hardware components, and software, will exceed \$1.3 trillion by 2025.

What problems do you face on a daily basis?

Managers struggle with continuous pressures to **commit to the transition to the cloud forced by market demand, competitors, upgrades, etc.**

These trends escape from a reality dominated by:

- **Lack of resources** for cloud adoption strategy and IT transformation.
- **Limited growth with the current model** (not scalable) and cannot keep pace with business demand.
- When the transition begins, you **lose control over your infrastructure, costs skyrocket**, and **there is no visibility into security compliance** (Does my infrastructure meet my internal standards? Is my data safe?).

Understanding your challenges to get the expected benefits

At **SilverStorm**, as a digital transformation consultancy company, we have the knowledge and understand the fears and challenges you face when migrating to the cloud. **We have worked hand in hand with multiple clients** creating a customized roadmap and accompanying them in the transition to the cloud in order to:

- Be an innovative and cutting-edge company by having your services in the cloud without dying in the attempt.
- Increase availability and expandability with a detailed migration and growth plan using the cloud.
- Use only the necessary cloud resources that you need.
- Expansión de la cartera de clientes.

A trip together with the least impact on your business

We will work with you to define a **roadmap and implementation plan** that perfectly fits your organization:

With fines of up to €20 million or 4% of annual revenue, data breaches aren't an option, but a risk that can severely hamper any cloud migration project.

Two out of five leaders report lower operating costs and higher ROI with automated hybrid cloud management systems, according to Forrester.

Clear and measurable objectives will be agreed on at the outset and measured at frequent intervals.

The level at which SilverStorm participates in the implementation and execution of the plan is flexible.

Our goal is to achieve the expected benefits of your Cloud strategy, with the least possible impact on your business.

Cloud Strategy Digital Transformation Program

You will go from being a company with little visibility in the sector due to your low technological innovation to being a **leading company recognized for its cutting-edge innovation processes.**

Tell us how far your company wants to go, and we will help you!
